CAMBRIDGE, Mass. - (CP) -Can the weather be modified on

What is the interior of the earth really like?

Why do continents and oceans exist, and why are they distributed

as they are? Answe's to questions such as these will be sought in a laboratory of earth sciences established at Massachusetts Institute of Tech-

nology. The laboratory will be under the direction of Prof. Henry G. Houghton, head of M.I.T.'s department of meteorology. It will try a new and integrated approach to experimental and theoretical investigations of man's environment: the atmosphere; the oceans, and the land masses between, including the interior of the earth.

# LINCOLN NATIONAL'S premium rates

Lour life insurance premium rate per unit of insurance generally depends upon your age, the plan you want, and your insurability. Now, Lincoln National adds a fourth dimensionamount of insurance. With the resulting 4-Dimensional premium plan, the more life insurance you buy, the less you pay for each thousand dollars of protection.

• Here's how it works. When you buy insurance, the company has some expenses that are the same for each policy-whether your policy is for \$5,000 or \$50,000 or more. Consequently, the larger the amount of your policy, the smaller these fixed expenses per thousand. Under the 4-D plan, Lincoln National passes the savings on to you.

The Rev. Carl Davis, starting his third year as pastor of the Carrier Mills Methodist church, has been active as a minister in the Southern Illinois conference of Methodist churches since 1933. Mr. Davis, a native of White county, started his ministry in

SPRINGFIELD The Senate today advanced to final passage stage a bill to abolish the death penalty in Illinois for a six-year trial period.

However, the Senate amended the measure to permit death sentences for prisoners serving life sentences who commit murder while in prison.

A murderer serving a 199-year term would have nothing to lose by killing another man, the bill's opponents argued.
